to your family, friends, and community naturally in your ordinary walk of life,
through a hands on the head technique, or intent.

Testimonials

Jeog Kyung, Senior Monk & Abbot, Bonginsa Buddhist Monastery & Temple, Korea

"Oneness brings you back into awareness of your spiritual identity. It gives you value for the self, love for the self, respect for the self and helps you love and value not only the lives of the other people around you, but also nature. It helps you value all forms of life. It doesn't make you change your faith in any way. That's not the intent. Rather you learn a lot about the faith of another and you go deeper into your own faith and explore what's going on in your own understanding. This experience brings greater inner strength."

Sister Jayanti, European Director of the Brahma Kumaris World Spiritual University
and member of the World Council of Religious Leaders

"Oneness strengthened my own spirit of unity, respect and brotherhood."

Dr. Imam Khorisani of the Islamic Society of California

"I am more open now to feel the universe and the things that surround me. The music I play is not my music. It is the universe's music. It is there. I channel it."
